

Mountain Building Plan Worksheet

Draw a picture of your mountain design. Show the locations for the materials used. Show your mountains topography – its height and width.

How much sand did you use?

How much soil did you use?

How much rock did you use?

Did you use any other materials? If so, what and for what purpose?

	Starting	Ending	Change
Mountain Height			
Mountain Width			

Describe your mountain after the wind and water. How did it withstand the experiment?

How would you change your design if asked to build another mountain?
